		CONFIDENTIAL	25X1
CENTRAL	INTELLIGENCE	GROUP	

25X1 44 machines and workers in the combines are working to capacity. On the other hand, efforts are being made to improve the lot of the workers. It is predicted that after all available raw materials have been used up, all machines and workers still capable of producing will be sent to the U.S.S.R.

5. Each plant has a Russian director-general assisted by a Russian directorate, consisting usually of a chief for commercial, technical, and financial sections. Under this directorate there are Russian supervisors who are younger experts trained in their respective fields. In addition, it is claimed that a MVD representative with a great deal of authority visits each plant frequently.
